Paul Eijssen;  
Esther Knabben

## Increase the use of visualisations:

*visuals make complex information more accessible and understandable*

### FOCUS TOPICS

*Create awareness of importance of visualisation*

*Work with and learn from visual designers*

*Stimulate end-users to use visuals and listen to their ideas and needs*

*Give an overview of existing tools, show available tools for the users purposes*

*Exchange visuals (or parts) between applications*

*Automate or standardize where possible (ex. ArcGIS maps)*

*Optimize the user experience, collect best practices, create a network of practitioners*

# Reporting

Make better use of: KES, iReport, MS Word

## FOCUS TOPICS

*Standardize and automate report, where possible (KES)*

*Automate connection between different parts of the report (Word / KES / iReport)*

*Create awareness about basic reporting / reviewing skills (Word)*

*Automate compliance with (government) guidelines check i.e. colour blind / language level (Word / KES / iReport)*

*From reporting to storytelling (iReport, connect with visualisation theme)*

*Connect with BEP and CDE to make sure that the progress of reports are tracked (naming / versions) (BEP / CDE)*

# Scripting & Programming

Make programming fun for everyone

## FOCUS TOPICS

Guidance on the floor for starters

- Don't know how to start? We can link you to a "buddy"

Share and promote good usage of existing tools (series of scripts) for regular users

- Look out for the lunch sessions about the existing tools
- Better good reused than bad invented
- Programming is just like playing with Lego. Learn about building blocks!

Look for a way to standardize and automate programming activities for experienced users

- Join us to create a hands-on standardization of scripts and programming
- Are you working with pandas every day and you're not a zookeeper? Join us to create programming2.0 at RHDHV!

# Project management

## FOCUS TOPICS

*Interested to learn about focus topics?  
Please reach out to:*

Matthias Dankers;  
Helmer Nijland;  
Trung Nguyen;  
Arno Lambregtse;  
Hans Hoerber

*Information is scattered everywhere (in different tools) How can we connect and (re)use project data?*

*There is no learning process from previous tenders. How can we learn from previous tenders and apply the lessons?*

*How can we make visualising / summarizing a planning more accessible for non planners?*

*Go / No go process of tenders takes too long. How to find the right people to pick up a request?*

*How to find the availability or skills of colleagues?*
